presenting the fundamental tools of experimentation that are currently used by engineers and scientists measurement and data analysis for engineering and science second edition covers the basics of experimentation hardware of experiments and methods of data analysis it also offers historical perspectives throughout updating and reorganizing its popular predecessor this second edition makes the text much easier to follow and enhances the presentation with electronic material new to the second edition order of chapters now reflects the sequence of topics usually included in an undergraduate course asterisked sections denote material not typically covered formally during lecture in an introductory undergraduate course more than 150 new problems bringing the total to over 420 problems supplementary website that provides unit conversions learning objectives review crossword puzzles and solutions differential equation derivations laboratory exercise descriptions matlab sidebars with m files and homework data files thorough and up to date this edition continues to help students gain a fundamental understanding of the tools of experimentation it discusses basic concepts related to experiments measurement system components and responses data analysis and effective communication of experimental findings ancillary materials for instructors are available on a cd rom and a solutions manual is available for qualifying instructors more data available on nd edu pdunn text measurements html

fundamentals of sensors for engineering and science is a practical analysis of sensors and measurement designed to help readers make informed decisions when selecting an appropriate sensor for a given application spurred by a growing demand for information on the evolution of modern sensors this book evaluates current applications to illustrate

a combination of two texts authored by patrick dunn this set covers sensor technology as well as

basic measurement and data analysis subjects a combination not covered together in other references written for junior level mechanical and aerospace engineering students the topic coverage allows for flexible approaches to using the combination book in courses matlab applications are included in all sections of the combination and concise applied coverage of sensor technology is offered numerous chapter examples and problems are included with complete solutions available

the second edition of this standard setting handbook provides an all encompassing reference for the practicing engineer in industry government and academia with relevant background and up to date information on the most important topics of modern mechanical engineering these topics include modern manufacturing and design robotics computer engineering environmental engineering economics patent law and communication information systems the final chapter and appendix provide information regarding physical properties and mathematical and computational methods new topics include nanotechnology mems electronic packaging global climate change electric and hybrid vehicles and bioengineering

thermal and flow measurements integrates thermal flow and chemical parameters to provide a foundation for applying diagnostic methods in various fields the book shows how measurements of thermal and flow parameters such as velocity temperature and pressure are made using various instrumentation it explains the fundamental operating principles behind the methodology so that extrapolations to emerging methods can be readily made this comprehensive text encompasses a broad range of disciplines including chemical engineering aerospace engineering and mechanical engineering that conduct experimental measurements with thermal flow and chemical parameters

providing comprehensive coverage of the field of mechatronics this book is useful for mechanical electrical and aerospace engineering majors it presents a review of electrical circuits solid state devices digital circuits and motors it also includes many illustrations examples class discussion items and chapter questions and exercises
